THE CLIMBERS' CLUB

The Climbers' Club was established in 1898 and is a national club founded to encourage climbing and to promote the interests of mountaineers and the mountain environment.

The Club has been producing definitive guidebooks to rock climbing in North Wales, Pembroke and the South West and South of England since 1909. These high quality publications are illustrated with pictures of climbers in action on a variety of routes. These photographs may have been specially arranged or may be casual photographs taken by a bystander. If the subject is under 18 years of age we will only use the photograph if the consent form below has been completed in full.
